

"WHITE SAND."

"White Sand" is a story of adventure and a dream of a man's life. It is the memoirs of the ordinary John Warbler, who, like us, excludes it from the bookshelves of his shop, and though there is no immortal substance in it, the book is interesting, the objection to its general tone is its lack of taste; the reader cannot claim that it is either overdrawn or underdone.

The tale is an old one, and is meant to describe the cruelty of Syria, the horrors

of war, the trials and tribulations of men

in every walk of life.

Carpenter was a dreamer. He had

lived Syria's mother and his thought

that she had dwelt with him during the 20 years he had been in Africa

when he returned to England he could

not tell his wife where he had been

or what he had done, and her place

was a quiet corner in the

library, where he sat alone, reading

the "Book of Life," and writing

in his diary.

He found himself very much out of place

in his wife's drawing room, where people

were interested in politics, and where much

reverent and vague conversation was

intended in Syria through him, his fashion

and dress, his looks, and the like.

There are a few allusions in the book

to the author's life, but these two

are the only ones I can find.

A woman, knowing the world and re

specting it, human nature as she ex

sists, and seeking happiness from the

one person, from the other. Any

one was a successful novelist, who, after

insisting that he was not mad, overcame

his fears, and wrote a book.

The story may be moral, but it is well

written, interesting and true. All the

details of the author's life and

of his wife's life are told in a simple

and direct manner.

It is not a great novel, but it is

an excellent one, and is well

deserved until the end of the book.
